

# ArcelorMittal Riverdale

## About ArcelorMittal Riverdale

Located in Riverdale, Illinois, just south of Chicago near the Indiana border, ArcelorMittal Riverdale is a compact strip mill and produces hot-rolled coil products. The location allows for close shipping access to Lake Michigan, and it is surrounded by excellent highway systems and railroads. The plant operates two basic oxygen furnaces, a ladle metallurgy facility, continuous thin slab caster and hot strip mill. The facility primarily serves cold-rolled strip producers who supply the automotive, saw blade and strapping markets. The light gauge capabilities and tight gauge tolerances are desired characteristics for line pipe and structural and mechanical tubing producers. Principal products made at this plant include hot-rolled black bands in a full range of grades, including high-carbon and alloy.

## About ArcelorMittal

ArcelorMittal is the world's largest steel and mining company. In 2015, ArcelorMittal globally had sales of \$63.6 billion, steel shipments of 93.2 million net tons and crude steel production of 101.9 million net tons. ArcelorMittal has approximately 222,000 employees and steelmaking operations in 19 countries on four continents.

In the United States, ArcelorMittal employs nearly 20,000 at over 20 operations, with an additional 1,200 employees in research and development, corporate offices and sales centers. In 2015, ArcelorMittal USA produced approximately 15 million net tons of raw steel used to create flat, long, tubular and tailored blank steel products serving the automotive, construction, pipe and tube, appliance, container and machinery markets.

## Riverdale facts

<b>Plant leadership</b>	Mark Dutler, operations manager
<b>Union representation</b>	Gary Bender, president USW 1010
<b>Employees</b>	322
<b>Acreage</b>	114
<b>Building space</b>	894,894 sq ft
<b>Steelmaking capacity</b>	Approximately 1 million tons
<b>Site founded</b>	1910
<b>Products</b>	Hot-rolled sheet
<b>Markets served</b>	Distribution, strip converter
<b>Services provided</b>	Producing and shipping coils
<b>Principal production facilities</b>	Basic oxygen furnace, compact strip production facility: ladle metallurgy facility, continuous thin slab caster, tunnel furnace, hot strip mill
<b>Certifications</b>	A2LA Accreditation and Scope for Chemical Testing, ISO 9001 Certificate, ISO 14001 Certificate, OHSAS 18001 Certificate

## Sustainability and corporate responsibility highlights

Our sustainability and corporate responsibility approach is driven by **10 sustainability outcomes** that we believe are essential not only for the long-term future of our business and our ability to deliver value for all stakeholders, but also for the role that steel has to play in creating high-quality, sustainable lifestyles for people all over the world. Highlights of five of these 10 outcomes, of which ArcelorMittal Riverdale plays an important role, include:

- **Safe, healthy, quality working lives for all of our people:** The lost time injury (LTI) frequency rate in the U.S. in 2015 was 1.33 per million worker hours, a 15 percent improvement over 2014.
- **Efficient use of resources and high recycling rates:** Nearly 28 percent of each ton of steel produced at ArcelorMittal USA is from recycled scrap steel.
- **Responsible energy user that helps create a lower carbon future:** 24 energy projects resulted in \$20 million in energy savings, the equivalent of powering 25,000 homes a year. Designated ENERGY STAR® partner and Better Buildings, Better Plants member.
- **Trusted user of air, land and water:** Recognizing the importance of water within our business, we are a leader and the sole corporate funder of Sustain Our Great Lakes, a public-private partnership to protect fish, wildlife and habitat throughout the Great Lakes Basin. The program has made \$113.6 million in conservation investments in the region since 2006.
- **Active and welcomed member of the community:** Since 2008, ArcelorMittal USA and its employees have invested over \$54 million in nonprofit organizations across the United States. Our signature grantmaking initiative is investing in science, technology, engineering and math (STEM) programs at the local and national level.

## An example of sustainability at ArcelorMittal Riverdale

ArcelorMittal Riverdale sits directly on the Little Calumet River just south of the city of Chicago in Illinois. Across the Little Calumet River from our facility is one of Chicago's largest forest preserves, Whistler Woods. ArcelorMittal Riverdale works directly with Friends of the Forest Preserves to ensure the native lands of this important biodiversity area are protected and restored. Currently, ArcelorMittal is funding investments in projects that plant native grasses and sedges along the Little Calumet River, helping to slow erosion and improve water quality as well as Whistler Woods projects to install plants and remove invasive species.

transforming tomorrow

ArcelorMittal Riverdale's corporate responsibility efforts are led by a Council for Stronger Communities (CSC). Comprised of diverse leadership from the facility, the CSC implements global, national and local initiatives and builds sustainable stakeholder partnerships.

## Major community investment partners at Riverdale include:

- Friends of the Forest Preserves
- Greater Chicago Food Depository
- Ingalls Memorial Hospital
- Riverdale School
- Teen Acting in Community Inc.
